Projects

GameChanger

Jan 2020 – Jun 2020

- Designed a hackathon website for GameChanger charity partnered with DreamHack using Agile methodologies
- Conducted user interviews, surveys, and testing
- Coded front-end interface using Vue.JS and Vuetify framework
- Used AWS services to host website and store data in databases

Planty

Jan 2020 – Mar 2020

- Worked on a mobile, mental-health app using Lean UX as a user experience researcher
- Created MVPs, Lean Canvas, and Value Proposition Canvas
- Conducted user testing with paper prototypes, smoke testing, and think aloud

MyPhilanthropies

Sep 2019 – Dec 2020

- Programmed a web app that supports signup, login, and tracking volunteer information for events
- Connected front-end interface with Django Database using jQuery and AJAX requests
- Wrote requirements document with user stories, use case diagrams, and UML diagrams

Camp Izza

Apr 2019 – Jun 2019

- Redesigned non-profit organization's website on Adobe XD
- Utilized HCI research techniques such as surveys, interviews, cognitive walkthroughs and heuristic evaluation
- Produced high fidelity mock-ups based on user feedback with group of four other students
