Projects

MyPhilanthropies Volunteer Tracker   SEP 2019 – DEC 2019

- Created a web app that supports signup, login, and tracking volunteer information for events
- Conducted bi-weekly meetings with clients to create requirements document with user stories, use case diagrams, and UML diagrams
- Connected front-end interface with Django Database using jQuery and AJAX requests

Spotify Web Browser   SEP 2019 – DEC 2019

- Programmed in Angular to create a local web application that displays artist, album, and track information
- Connected to Spotify's Web Development API using Express calls
- Built webpages using Angular components and dynamically bound information

Camp Izza Website   APR 2019 – JUN 2019

- Modernized non-profit organization's website using user-driven design principles
- Utilized HCI research techniques such as surveys, interviews, cognitive walkthroughs and heuristic evaluation
- Produced high fidelity mock-ups based on user feedback using Adobe XD and free assets with group of four other students

Anteater Academics   JAN 2019 – MAR 2019

- Simplified UCI's schedule of classes, class registration, class scheduling, and communication with faculty with three other students
- Facilitated mock elicitation meetings with another group of 4 students for requirements analysis
- Created multiple development artifacts such as user stories, rich picture diagrams, and use case diagrams to build a requirements document

Work Experience

Cashier, 7Leaves Café   JUN 2018 – SEP 2019

- Remained proactive in maintaining store's cleanliness and stock
- Built rapport with regulars to incentive returns
- Communicated with team of 4-6 people for correctness and established flow throughout busy periods
